

Model 286-RD Atomizer

HCPCS:

- The Model 286-RD Atomizer is designed especially for applying a fine mist to nasal and oral cavities and for administering an oral vaccine
- Ultra-fine particle atomization of most medical solutions
- Straight flow tip is easily disassembled for cleaning
- Suitable for applying fine, medicated spray to nasal and oral cavities, or oral vaccines
- May be used with compressed air, the No 1 bulb or Model 630 Bleeder-Type cut-off
- Constructed of polypropylene material for spraying solutions incompatible with metal
- Popular with treatment of animals and veterinary clinics and is used for testing in laboratory research
- Used by E.N.T doctors, research laboratories, veterinarians, burn centers, wound care facilities, emergency rooms
