

Transparent Film Dressings

Transparent Films: May be used as a primary or secondary dressing. Helps maintain a moist wound surface to assist in autolytic debridement in wounds with necrotic tissue. Film dressings are thin and water-resistant, and water, bacteria or other contaminants cannot penetrate the dressing. They are moisture vapor permeable which aids in moisture management. Allows wound site to be visually monitored.

Indications: Protect wounds and IV catheter sites, helps maintain a moist wound surface to assist in autolytic debridement, maintain a moist environment for wound healing and as a secondary dressing.

Contraindications: Patients with a known hypersensitivity to the product itself or to its components.

Change Frequency: Change dressing as directed by a healthcare professional.

Recommended Secondary Dressings: n/a
