

Unna Boot/Unna Boot with Calamine

Unna Boot: Gauze bandage that has been evenly impregnated with a non-hardening paste of zinc oxide to provide venous ulcer compression therapy. Contains no gelatin. Non-raveling, thread-locked gauze helps prevent loose threads that can contaminate wounds.

Unna Boot with Calamine: Gauze bandage that has been evenly impregnated with a non-hardening paste of zinc oxide and calamine to provide venous ulcer compression therapy and help ease itching.

Indications: Provides venous ulcer compression therapy in actively ambulatory patients. Dries the oozing and weeping of poison ivy, poison oak, or poison sumac. Ideal for managing extremities with conditions such as venous ulcers that require protection and support.

Contraindications: Patients with a known hypersensitivity to the product itself or to its components, including zinc oxide or calamine. Unna boots are not intended to provide compression therapy in non-ambulatory patients.

Change Frequency: Change dressing as directed by a healthcare professional, typically once or twice a week.

Recommended Secondary Dressings: Cohesive bandage.

ORDERING INFORMATION

DESCRIPTION	MFR #	QTY	HCPCS	EXUDATE LEVEL*
Unna Boot 3", with Zinc Oxide, Non-Sterile, 3" x 10 yds	2066	1/bx, 12bx/cs	A6456	N/A
