

Oil Emulsion Dressings

The McKesson Oil Emulsion Dressing is made of high-porosity gauze impregnated with U.S.P. Petrolatum, treating fragile tissues with gentle care. Sterile and non-adherent, it maximizes comfort during dressing change or removal. The breathable fabric prevents the pooling of fluid by draining exudate away from the wound site. From burns and ulcers to surgical incisions, our oil emulsion dressing provides a moist environment conducive to wound healing. Its conformability offers effective management of infected and non-infected wounds.

Features and Benefits

- Infused with an emulsified blend of U.S.P. Petrolatum; compatible with other treatments
- Sterile and non-adherent to resist sticking to skin; helps to enhance patient comfort
- Minimal maceration and occlusion due to open mesh, knitted fabric
- Resists shredding or unraveling when trimmed to size
- Not made with natural rubber latex
