

ECG Electrodes

McKesson offers a full range of electrodes for resting ECGs, monitoring or general diagnostics. With products varying in sizes, shapes and substrates, McKesson ECG Electrodes are designed to address your clinical needs. Our electrodes feature a Silver/Silver Chloride sensing system, which is defibrillation recoverable. We also offer a McKesson Resting Tab Electrode with Tin backing designed for optimal conduction and fast readings. Our electrodes are designed to deliver excellent adhesion, as well as consistent, reliable tracings and performance, which meet ANSI/AAMI EC12:2000 standards.

Features and Benefits

- Variety of styles and substrate offerings to accommodate the most frequent monitoring and diagnostic applications
- Helps deliver clear, reliable tracings for optimal performance
- Wide range of adhesive properties
- Courtesy lift-tab or snap designs available for easy placement and removal
- Not made with natural rubber latex
