

## Calcium Alginate Dressings

**Calcium Alginates:** Primary dressing that can be cut to fit wounds with moderate to heavy exudate. They absorb wound fluid while maintaining a moist wound environment. The alginate, derived from seaweed, turns to a moist gel mass material when saturated. Requires a secondary dressing.

**Indications:** Wounds with moderate to heavy exudate and may help absorb minor bleeding.

**Contraindications:** Patients with a known hypersensitivity to the product itself or its components.

**Change Frequency:** Change dressing as directed by a healthcare professional.

**Recommended Secondary Dressings:** Cover with an appropriate secondary dressing depending on the amount of exudate and frequency of dressing change.

### ORDERING INFORMATION

DESCRIPTION	MFR #	QTY	HCPCS	EXUDATE LEVEL*
Calcium Alginate Dressing, Rope, Sterile, 3/4" x 12"	3564	1/ea, 5/bx	A6199	●●●
