

Manual Resuscitators

McKesson Manual Resuscitators are designed to help medical staff provide patients with total or intermittent pulmonary support. Multidirectional swivels enable medical staff to use on patients from most positions. The built-in adjustable POP-OFF valve prevents excess pulmonary pressure from being applied during resuscitation to pediatric patients. McKesson Manual Resuscitators feature clear air cushion masks to allow for easy viewing. They form a tight seal that is tailored to each patient. Available in adult and pediatric sizes.

Features and Benefits

- Up-front O2 reservoir delivers 95% or greater oxygen concentration and allows for easy visual oxygen flow monitoring
- Flexible neck and dual swivels allow versatility in positioning and reduced tongue on airways
- Duckbill valve and housing design keeps vomitus contained and easily cleared
- Oxygen reservoir bleed vents minimize inadvertent PEEP
- Pediatric Resuscitator has adjustable POP-OFF valve
- Exhalation port directs exhaled breath away from caregiver
- Designed for single-patient use
- Not made with natural rubber latex
