

Spirometry Products & Accessories

McKesson LUMEON® EasyOne® Plus Diagnostic Spirometry System is a simple and easy-to-use apparatus designed to make lung-function testing fast and reliable. This highly portable instrument can be used for point-of-care testing or bedside monitoring, and is ideal for physician's offices, hospitals and long term care facilities. Our spirometers use disposable mouthpieces called spirettes®, which help reduce risk for cross-contamination and eliminate the need for sterilization.

Our offering also includes the McKesson Easy on-PC® Spirometry System, which uses the power of your PC, laptop, or tablet, and leverages TrueFlow® ultra sound technology for a complete spirometry solution. This PC spirometer uses pediatric incentives, offers challenge testing, and displays inspiratory and expiratory real-time curves. Some of the essential features of our spirometry products include: flexible EMR capabilities, trending, selectable predicted values and interpretation, and automated quality control.

Features and Benefits

- TrueFlow® technology ensures high accuracy of the results
- LCD display and alpha-numeric keypad make the device easy-to-use
- Direct printing and PC connection possibilities allow for different report options
- No calibration, maintenance, or down time ensure low operating costs
- Long-lasting batteries are good for approximately 400 tests
- 3-year exchange warranty

Satisfaction Guaranteed
 If you are not completely satisfied with any McKesson Brands product, you may return it for a full refund or credit.
