

EasyOne® Air Spirometry System

The McKesson Lumeon® EasyOne® air spirometer offers true portability for testing anytime, anywhere. A spirometry test measures how much and how fast a patient can expel air from their lungs. This portable and PC spirometer is intended to conduct diagnostic spirometry testing of adults and pediatric patients (more than four years old) to diagnose asthma, COPD and other lung diseases. It is also frequently used in occupational health to assess an employee's fitness to wear a respirator and monitoring of employee's lung health over time.

The McKesson Lumeon® EasyOne® flow tube is a disposable mouthpiece that helps reduce risk of cross-contamination. Resistance-free testing is for precise measurement.

Features and Benefits

EasyOne® Air Spirometer

- Large color touchscreen for easy data entry and navigation
- EasyOne® Connect software for EMR integration and PC spirometry
- Bluetooth connectivity
- Long-lasting rechargeable battery
- Calibration-Free TrueFlow Technology for high accuracy of results
